IYYAPPAN SIVAKUMAR

Senior Full Stack Engineer | React Native | React.js | Next.js | Node.js | GraphQL | AWS

Chennai, India (IST, UTC+5:30) | iyyappanrock535@gmail.com | linkedin.com/in/iyyappan-sivakumar-624242168 | iyyappanrock535.github.io

Open to remote roles with working-hour overlap for US (EST), Europe (CET) and Singapore (SGT) teams

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with **7+ years** building production web and mobile applications for sports-management, fintech, and real-time platforms. Owns features end to end, from architecture and database design to deployment and production support, across **React.js, React Native, and Node.js**, along with Next.js, Sails.js, GraphQL, PostgreSQL, and AWS. Fully remote since Oct 2022 for **Canadian tech company Communiti** (via global payroll), promoted to Senior in Oct 2025, and working async-first across EST/PST time zones. Seeking **remote-first roles** with product startups in the US, Europe, Singapore, or Dubai.

TECHNICAL SKILLS

Frontend	React.js, Next.js, Vite, TypeScript, JavaScript (ES2022+), Apollo Client, Tailwind CSS, HTML5, CSS3, Webpack
Mobile	React Native, Expo, iOS & Android Release (App Store, Google Play), Push Notifications, Deep Linking, Offline-first Sync
Backend & APIs	Node.js, Express.js, Sails.js, GraphQL, REST APIs, WebSockets, Cron Jobs, Python, Flask
Databases	PostgreSQL, SQL (Relational Data Modelling), Firebase (Firestore, Realtime Database), Redis
Cloud & DevOps	AWS (EC2, S3, RDS, Lambda), Docker, CI/CD (GitHub Actions, Fastlane), Git
AI & Automation	Generative AI, LLMs, Prompt Engineering, RAG, LangChain, Hugging Face Transformers, AI-driven Automation Testing, AI-assisted UI Design
Security & Payments	OAuth 2.0, JWT, Firebase Auth, Role-Based Access Control (RBAC), Audit Logging, Stripe, eNACH
Testing	Jest, React Testing Library, Detox, Postman
Practices	System Design, Performance Optimisation, Code Review, Mentoring, Agile/Scrum, Async Remote Collaboration

WORK EXPERIENCE

Senior Full Stack Engineer

Oct 2025 – Present

Communiti (Canadian Tech Company — Remote via Global Payroll) *Canada (Remote from India)*

- Lead full-stack development of Communiti's sports-management platform: the **Club App** for clubs, leagues, camps, and coaches, and the **Athlete App** for athlete and parent booking.
- Design and own features end to end, from PostgreSQL data modelling and Sails.js / Node.js APIs to React.js (Vite, Tailwind CSS) interfaces and production release.
- Optimise GraphQL and REST APIs with query batching and caching, and tune PostgreSQL with indexing, query-plan analysis, and schema normalisation for faster pages and reports.
- Manage AWS infrastructure (EC2, S3, RDS) and GitHub Actions CI/CD pipelines for automated, reliable deployments.
- Build real-time chat (WebSockets), push notifications, deep linking, and offline-first data sync for the React Native app, using Apollo Client for GraphQL data fetching.
- Integrated AI into the team workflow: AI-driven automation testing to speed up regression coverage, and AI-assisted UI design for faster prototyping and screen design.
- Lead technical architecture reviews and mentor junior engineers on code quality and review practices.
- Collaborate async-first with a distributed Canadian team across EST/PST through PR reviews, written documentation, and daily stand-ups.

Full Stack Engineer

Oct 2022 – Oct 2025

Communiti (Canadian Tech Company — Remote via Global Payroll) *Canada (Remote from India)*

- Built registration, scheduling, booking, and order flows for the Club and Athlete web apps with React.js, Vite, and Tailwind CSS.
- Developed Sails.js, Node.js, and Express.js backend services on a relational PostgreSQL database supporting **10K+ daily active users**.
- Integrated Stripe payments with role-based access control (RBAC) and audit trails.
- Automated recurring background tasks with Node.js cron jobs.
- Shipped cross-platform React Native applications for iOS and Android to the App Store and Google Play.
- Improved web performance with lazy loading, code splitting, and bundle optimisation.
- Contributed to Agile sprints through code reviews, sprint planning, and technical design discussions.

Frontend Developer
May 2019 – Oct 2022

StudioQ Web Solutions — *Puducherry, India*

- Built pixel-perfect, responsive web applications with React.js, JavaScript, and modern CSS frameworks.
- Built reusable React component libraries that sped up feature development across client projects.
- Improved page-load performance (Largest Contentful Paint) through lazy loading, component refactoring, and Webpack bundle analysis.
- Delivered production-ready features on schedule in collaboration with UI/UX designers and backend teams.

KEY PROJECTS

Communiti Club App — Sports Club Management Platform
club.communiti.app

- Built the organizer web app used by sports clubs, leagues, camps, and coaches (part of a platform trusted by hundreds of sports organizations) to manage programs, online registration, scheduling, payments, orders, and member communication.
- Developed the frontend with React.js, Vite, and Tailwind CSS, delivering fast, responsive dashboards and registration flows.
- Built Sails.js / Node.js REST APIs on a relational PostgreSQL schema for programs, sessions, registrations, orders, and customers.
- Automated recurring background work with Node.js cron jobs and owned production deployments.
- *Tech: React.js, Vite, Tailwind CSS, Sails.js, Node.js, PostgreSQL, Cron Jobs, REST APIs*

Communiti Athlete App — Booking & Registration
book.communiti.app

- Built the athlete- and parent-facing booking app for browsing programs, registering, booking sessions, and paying online.
- Developed a mobile-friendly React.js + Vite + Tailwind CSS interface on shared Sails.js / Node.js APIs and the PostgreSQL database.
- Handled builds and production deployments alongside the club platform.
- *Tech: React.js, Vite, Tailwind CSS, Sails.js, Node.js, PostgreSQL*

Thangam Capital — Loan Management System (NBFC)
thangamcapital.com

- Built a full-stack loan management system for Thangam Capital, an NBFC lending to micro-enterprises, women entrepreneurs, and farmers across rural Tamil Nadu.
- Built the loan origination flow: applicant and co-applicant onboarding, application creation, and conversion of approved applicants into customers.
- Implemented the end-to-end loan lifecycle: loan creation and disbursement, repayment schedules, payment-due tracking, and a customer ledger for disbursements, repayments, and balances.
- Integrated eNACH e-mandate registration for automated EMI collection, alongside non-eNACH (manual) repayment collection.
- Built loan-officer workflows with role-based access control (RBAC), JWT authentication, and audit logging for compliance-aware operations.
- Delivered reporting dashboards with PDF report generation for loan and collection data.
- *Tech: Next.js, Node.js, PostgreSQL, REST APIs, AWS (EC2, S3, RDS), eNACH*

EDUCATION

Bachelor of Technology (B.Tech) — Information Technology
2014 – 2018

Perunthalaivar Kamarajar Institute of Engineering and Technology — *Karaikal, Puducherry, India*

CERTIFICATIONS

IBM Generative AI Engineering — Professional Certificate (16 courses)
Aug 2026

IBM via Coursera | coursera.org/verify/professional-cert/385TAM6YF000

- LLMs and transformers, prompt engineering, fine-tuning, RAG with LangChain, PyTorch and Hugging Face, and AI apps with Python and Flask.

Generative AI for Mobile App Developers — Specialization (4 courses)
Dec 2025

IBM / SkillUp via Coursera | coursera.org/verify/specialization/QT6QWB2SEZCH

- AI integration in software and mobile app development, prompt engineering, and AI-assisted code generation.
